

VIGNESHWARAN B

Java Full Stack Developer

Chennai, Tamil Nadu | +91 86376 40729 | vigneshwaranuec@gmail.com

Linkedin: [LinkedIn/Vigneshwaran](#) | GitHub: [Github/Vigneshwaran](#)

PROFESSIONAL SUMMARY

Computer Science Engineering Graduate with hands-on experience building web applications using Java, Spring Boot, Spring Security, JDBC, JPA/Hibernate, MySQL and React.js. Built a real-time messaging application with JWT authentication and WebSocket, and completed a backend internship using Python Django. Seeking an entry-level Java Full Stack Developer role to build secure, scalable REST-based applications.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, REST APIs, JWT, Django, FastAPI

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Database: MySQL

Tools: Git, GitHub, Postman, IntelliJ IDEA, Eclipse, Visual Studio Code

PROJECTS

Connectly – Real-Time Messaging Web Application

Technologies: React.js, Java, Spring Boot, Spring Security, REST API, WebSocket, MySQL, JPA/Hibernate, JWT

- Developed a full-stack real-time messaging application with React.js frontend, Spring Boot backend and MySQL for persistent storage.
- Implemented JWT authentication and Spring Security with BCrypt password hashing, protected APIs, input validation and role-based authorization.
- Built one-to-one and group chat with real-time communication using WebSocket.
- Created a connection system: search users by email, send, accept or reject requests, and chat only after a successful connection.
- Added text, image, video and sticker messages with reply, forward, delete, star, and sent/delivered/read status.
- Developed text and image status sharing with 24-hour expiration, plus mute, block/unblock, profile management and password change features.
- Designed RESTful APIs with Spring Data JPA and Hibernate using a layered architecture of controllers, services, repositories, DTOs and entity relationships.
- Integrated React with REST APIs and WebSocket services; tested APIs, authentication, real-time messaging and media handling.

Autonomous Predictive Maintenance System

Technologies: FastAPI, Spring Boot, JWT, REST APIs, LLM

- Built an LLM-based vehicle diagnostics system for real-time root cause analysis, anomaly detection and predictive maintenance.
- Developed backend microservices using FastAPI and Spring Boot with secure JWT-based authentication.
- Created REST APIs for risk alerts, automatic service scheduling and real-time fleet health monitoring dashboards.

EcoStream-Lite: Agentic AI Framework for E-Commerce Automation

Technologies: Python, NLP, DistilGPT-2

- Developed a resource-efficient agentic AI system that automates product descriptions, customer replies and sentiment analysis.
- Engineered prompt-driven text generation with centralized dashboard control and CPU-only deployment for low-resource environments.

WORK EXPERIENCE

Backend Developer Intern – NexGen Innovator Solutions, Chennai

June 2025 – July 2025

- Worked on a Student Portal using Python Django to manage student profiles and academic records.
- Implemented core modules including user authentication, student registration, profile management and secure data handling.
- Contributed to responsive front-end interfaces and delivered project milestones on time.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

Oct 2022 – May 2026

University College of Engineering Kanchipuram

CGPA: 7.7

Higher Secondary (Computer Science with Mathematics)

Jun 2021 – May 2022

Lourdu Annai Higher Secondary School

86.6%

CERTIFICATIONS

Java with Spring Boot – [Naan Mudhalvan](#)

Sep 2025

Internship Completion Certificate – [NexGen Innovator Solutions](#)

Jul 2025

Artificial Intelligence Fundamentals – [IBM SkillsBuild](#)

Feb 2026

Experience Based Project Learning – [Naan Mudhalvan](#)
